

SmartAir Controller Series

SOHO & Enterprise class Smart WLAN Controller

Key features & Benefits

Selectable systems according to network scale and power redundancy feature

SmartAir controller solution have various systems according to the number of AP to be served . Each models support up to 128, 256, 512, 4096 APs. 3 models have power redundancy feature.

Detecting and Blocking DDoS attacks

SmartAir Controller provides the function which is to detect and block the DDoS attacks like TCP SYN flooding, ICMP flooding, UDP flooding, ARP flooding and IP spoofing, IP sweeping, etc.

Simple to use and manage

Web-based configuration wizard configures an entire WLAN in minutes. Centralized management and automatic optimization of entire WLAN.

Advanced WLAN features and functions

Advanced wireless networking features include rogue AP & other threat detection, interference detection, band steering, airtime fairness, role-based user policies, per-user/per-SSID/per-group rate-limiting, hotspot and guest networking services.

Distributed forwarding architecture

Maximizes data throughput by sending all data traffic directly from the access points to the wired network. Of course, the management traffic will be sent to controller.

Simple to deploy

SmartAir Controller integrates seamlessly with existing switches, firewalls, authentication server and other network infrastructure. Access points can be configured and applied automatically by using Smart Group function that classify according to AP names within DISCOVER message and apply the configuration.

System Redundancy

Redundancy feature of SmartAir controller ensures high network availability and is easy to use with automatic synchronization of configuration and authorized users between controllers.

Simple to manage

SmartAir Controller automatically manages the SmartAir network of APs - automatically adjusting transmit power levels and RF channel assignments as needed, to avoid interference, prevent adjacent APs from interfering and enable redundant coverage in the event of an AP failure. Configuration changes can easily be applied to multiple APs, or the entire system, simultaneously.

Specifications of SC-2000

Physical Characteristics

Power	" 460W, 1+1 ATX redundant power supplies
Physical Size	" 430 mm(W) x 580 mm(D) x 88 mm(H)
Weight	" 19.00 kg
Processor	" Dual Intel Xeon E5620 2.4GHz
Memory	" Four DDR3 4GByte (total 16GByte)
Storage	" One 240GB SSD " One 1TB SATA3 HDD
Ethernet ports	" Four 1Gbps SFP ports (optional) " Four 10/100/1000Mbps RJ-45 ports
Console	" One RJ-45 Type port
USB port	" Two USB 2.0 Host ports
Environmental Conditions	" Operating Temperature : 5°C ~ 40°C

Capacity

Managed APs	" Up to 4,096
WLANs(SSIDs)	" 2,048
Concurrent stations	" Up to 163,840

Specifications of SC-500

Physical Characteristics	
Power	" 200W, 1+1 ATX redundant power supplies
Physical Size	" 426 mm(W) x 450 mm(D) x 44 mm(H)
Weight	" 7.97 kg
Processor	" Intel i5 3470 (3.2GHz)
Memory	" Two DDR3 4GByte (total 8GByte)
Storage	" One 240GB SSD
Ethernet ports	" Eight 10/100/1000Mbps RJ-45 ports
Console	" One RJ-45 Type port
USB port	" Four USB 2.0 Host ports
Environmental Conditions	" Operating Temperature : 5°C ~ 40°C

Capacity	
Managed APs	" Up to 512
WLANs(SSIDs)	" 2,048
Concurrent stations	" Up to 20,480

Specifications of SC-300

Physical Characteristics	
Power	" 200W Single power supply
Physical Size	" 426 mm(W) x 450 mm(D) x 44 mm(H)
Weight	" 7.32 kg
Processor	" Intel i5 3470 (3.2GHz)
Memory	" Two DDR3 4GByte (total 8GByte)
Storage	" One 240GB SSD
Ethernet ports	" Eight 10/100/1000Mbps RJ-45 ports " One MGMT & One HA port
Console	" One RJ-45 Type port
USB port	" Four USB 2.0 Host ports
Environmental Conditions	" Operating Temperature : 5°C ~ 40°C

Capacity	
Managed APs	" Up to 512
WLANs(SSIDs)	" 2,048
Concurrent stations	" Up to 20,480

Specifications of SC-400

Physical Characteristics	
Power	" 300W, Single power supply
Physical Size	" 432 mm(W) x 236.5 mm(D) x 44 mm(H)
Weight	" 3.35 kg
Processor	" Freescale, LS1024A, 1.2GHz
Memory	" One DDR3 2GByte
Storage	" One 128GB SSD
Ethernet ports	" One 10/100/1000Mbps RJ-45 port(Uplink) " Eight 10/100/1000Mbps RJ-45 ports (Eight PoE-PSE 802.3af/at ports)
Console	" One RJ-45 Type port
USB port	" One USB 2.0 Host port
Environmental Conditions	" Operating Temperature : 5°C ~ 40°C

Capacity	
Managed APs	" Up to 256
WLANs(SSIDs)	" 2,048
Concurrent stations	" Up to 10,240

Specifications of SC-210/220

SC-210 Rear View

SC-220 Rear View

Redundant AC Power

Physical Characteristics

Power	" SC-210 : 70W, Single power supply " SC-220 : 70W, 1+1 ATX Redundant power supplies
Physical Size	" 432 mm(W) x 236.5 mm(D) x 44 mm(H)
Weight	" 3.35 kg
Processor	" Freescale, LS1024A, 1.2GHz
Memory	" One DDR3 2GByte
Storage	" One 128GB SSD
Ethernet ports	" One 10/100/1000Mbps RJ-45 port(Uplink) " Eight 10/100/1000Mbps RJ-45 ports
Console	" One RJ-45 Type port
USB port	" One USB 2.0 Host port
Environmental Conditions	" Operating Temperature : 5°C ~ 40°C

Capacity

Managed APs	" Up to 256
WLANs(SSIDs)	" 2,048
Concurrent stations	" Up to 10,240

Features

Radio Resource Management

- " Dynamic Channel Control/Selection
- " Automatic transmit power and channel control
- " Self-healing with coverage hole detection
- " Band steering with multiple steering modes
- " Load balancing of clients
- " Airtime fairness
- " Adaptive Noise Immunity
- " Analyzing RF Spectrum
- " Smart Mesh with indoor/outdoor APs
- " Performance protection in congested RF environments
- " Mitigates co-channel interference with coordinated access
- " Mitigates adjacent channel interference with optimized receiver sensitivity
- " Efficient reuse of channels at shorter intervals
- " Mitigates non 802.11 interference without dedicated radios

Service and Networking

- " L2 fast roaming
 - Opportunistic Key Caching
 - PMK Key Caching
- " L3 Roaming
 - GRE tunnel between APs
- " Bridging or NAT for LAN/Wireless
- " DHCP Server/Client
- " VLAN assignment per SSID
 - Optionally, by filer-id of external RADIUS server
- " Q-in-Q tagging

Security, Authentication and Encryption

- " Stateful inspection firewall(DoS attack prevention)
 - TCP/UDP flooding
 - SYN flooding
 - ARP flooding
 - IP Spoofing
 - IP Sweeping
 - Port Scanning
 - Session Limit by source or destination
- " AP access control from remote device
- " ACL policy with IP address, port of source and destination
- " WPA-PSK / WPA2-PSK
- " IEEE 802.11i / WPA2 with passphrase (WPA2-Personal)
- " IEEE 802.1X (WPA2-Enterprise) and hardware-accelerated AES
- " EAP Types
 - EAP-TLS
 - EAP-TTLS/MSCHAPv2
 - PEAPv0/EAP-MSCHAPv2
 - PEAPv1/EAP-GTC
 - EAP-SIM
 - EAP-AKA/EAP-AKA Prime
 - EAP-FAST
- " TKIP/AES
- " High availability for authentication
 - When disconnecting with controller, AP try to authenticate RADIUS server directly for wireless stations
- " WIDS (Wireless Intrusion Detection System) feature
 - Rogue AP detection
 - Misconfigured AP detection
 - Client Misassociation detection
 - Unauthorized Association detection
 - Adhoc detection
 - Honey pot detection
 - AP MAC Spoofing detection

Note : WIDS feature will be available in 3Q, 2015.

QoS

- " Wireless Multimedia Extensions(WME, subnet of IEEE 802.11e)
- " U-APSD/WMM Power Save
- " Prioritizes voice over data for both tagged and untagged traffic
- " Rule and role based QoS processing
- " QoS policy and Rate Limitation per group, station
 - DSCP
 - 802.1P
 - 802.1P/WMM

Note : SC-210/220 will be available in 3Q, 2015.

Note : SC-210/220/400 will have some limitations. So several features like network device management, smart mail, smart report won't be supported.
